

# Cyber Resilience Solutions

*Ensuring Post-Breach Data Recovery and Business Continuity*

## 2025 CONSTELLATION SHORTLIST

The Constellation ShortList™ presents vendors in different categories of the market relevant to early adopters. In addition, products included in this document meet the threshold criteria for this category as determined by Constellation Research.

This Constellation ShortList of vendors for a market category is compiled through conversations with early adopter clients, independent analysis and briefings with vendors and partners.

### ABOUT THIS SHORTLIST

As cyber threats become increasingly sophisticated and pervasive, businesses must adopt a proactive stance toward resilience. As enterprises face rising cyber risks, the ability to recover data and maintain operational continuity has become a strategic priority. Cyber Resilience solutions address this need by providing robust capabilities for ransomware protection, immutable storage, and intelligent recovery, empowering businesses to mitigate risk and maintain stakeholder trust.

Cyber Resilience solutions go beyond traditional backup and recovery to ensure data integrity, rapid restoration, and business continuity following a breach or disruption. These solutions are designed with a post-breach resilience mindset, enabling organizations to bounce back quickly and minimize operational downtime while protecting critical assets.

## 6 SOLUTIONS TO KNOW

Constellation evaluates more than 30 solutions categorized in this market. This Constellation ShortList is determined by client inquiries, partner conversations, customer references, vendor selection projects, market share and internal research.

-  **ACRONIS**
-  **COHESITY**
-  **COMMVAULT**
-  **DRUVA**
-  **RUBRIK**
-  **VEEAM**

## THRESHOLD CRITERIA

Constellation considers the following criteria for these solutions:

- **Immutable backups:** Ensure backup data cannot be altered or deleted, protecting against ransomware and insider threats.
- **AI-powered anomaly detection:** Use AI to identify unusual patterns in data or access, enabling rapid response to potential cyber incidents.
- **End-to-end encryption:** Secure data at rest, in transit, and during recovery to safeguard sensitive information.
- **Granular recovery options:** Offer flexibility to recover specific files, applications, or entire systems based on business needs.
- **Automated failover and restoration:** Enable seamless transition and recovery in case of data breaches or system failures.
- **Unified management:** Centralize monitoring, reporting, and control for streamlined operations across hybrid and multi-cloud environments.
- **Proactive risk mitigation:** Incorporate threat intelligence and predictive analytics to reduce vulnerabilities and enhance readiness.

## ABOUT CONSTELLATION RESEARCH

As an award-winning Silicon Valley-based strategic advisory and futurist analyst firm, Constellation Research serves leaders and organizations navigating the challenges of digital strategy, business-model disruption and digital transformation. Constellation works closely with solution providers, partners, C-suite executives, board of directors, and its Constellation Executive Network of buy-side leaders to lead the way in research coverage and advise clients how to achieve valuable business results.

## FREQUENCY OF EVALUATION

Each Constellation ShortList is updated at least once per year. Updates may occur after six months if deemed necessary.

## EVALUATION SERVICES

Constellation clients can work with the analyst and the research team to conduct a more thorough discussion of this ShortList. Constellation can also provide guidance in vendor selection and contract negotiation.

## BUSINESS THEMES

Digital Safety, Privacy and Cybersecurity

### Chirag Mehta VP & Principal Analyst

Chirag Mehta is Vice President and Principal Analyst focusing on cybersecurity, next-gen application development, and product-led growth. With over 25 years of experience, he has built, shipped, marketed, and sold successful enterprise SaaS products and solutions across startups, mid-size, and large companies. As a product leader overseeing engineering, product management, and design, he has consistently driven revenue growth and product innovation. He also held key leadership roles in product marketing, corporate strategy, ecosystem partnerships, and business development, leveraging his expertise to make a significant impact on various aspects of product success.
